

Whitepaper v.1.3

Introduction

The global financial system is undergoing a massive transformation driven by blockchain technology. Cryptocurrencies have grown from niche digital assets into multi-trillion-dollar ecosystems that power payments, decentralized finance (DeFi), gaming, and more. However, despite this growth, there remain barriers to mass adoption: high fees, limited accessibility, and lack of trust in projects that disappear without building real utility.

Cryptix (CRPX) is designed to address these challenges by delivering a fast, secure, and limitless ecosystem that empowers users across industries. Built on the BNB Chain as a BEP-20 token, Cryptix aims to become more than a tradable asset—it will be the fuel that powers DeFi utilities, NFT transactions, staking platforms, play-to-earn games, and decentralized governance.

Our vision is to merge the reliability of blockchain with practical usability so that ordinary users, developers, and businesses can benefit. By combining a fair presale, strong tokenomics, and a growing community, CRPX will be positioned as the foundation of a digital economy that is transparent, rewarding, and sustainable.

Cryptix is not just a coin—it is a movement toward building a global ecosystem where users can transact, stake, vote, and participate in a wide variety of decentralized opportunities.

Tokenomics

Tokenomics is the backbone of any blockchain project. For Cryptix, we've structured our supply and allocation model to ensure long-term sustainability, fairness, and growth potential.

- Token Name: Cryptix
- Symbol: CRPX
- Chain: BNB Chain (BEP-20 standard)
- Decimals: 18
- Total Supply: 10,000,000,000 CRPX

Allocation:

- Presale (45%) – 4,500,000,000 CRPX will be distributed through multiple presale phases to ensure early supporters benefit while creating demand over time.
- Liquidity (25%) – 2,500,000,000 CRPX will be allocated to provide deep liquidity pools on decentralized exchanges like PancakeSwap, ensuring smooth trading and minimal slippage.
- Community & Marketing (30%) – 3,000,000,000 CRPX will be reserved for partnerships, community rewards, referral programs, and global marketing campaigns. This structure ensures that no single entity has overwhelming control. Instead, tokens are distributed to support growth, adoption, and stability.

Presale Details

The Cryptix presale is designed to reward early adopters while gradually increasing value. It consists of five phases, each with its own allocation and price tier:

Phase	Allocation	Price (USD)	Tokens Released
Phase 1	12.0%	\$0.001	1,20,00,00,000
Phase 2	10.5%	\$0.005	1,05,00,00,000
Phase 3	9.0%	\$0.01	90,00,00,000
Phase 4	7.5%	\$0.05	75,00,00,000
Phase 5	6.0%	\$0.1	60,00,00,000

Accepted Payments:

- BNB (Binance Coin): Prices are converted in real time using the Chain link BNB/ USD price feed.
- USDT (BEP-20): Stablecoin support ensures users can participate without worrying about price volatility.

Claiming Tokens:

- All tokens purchased in the presale will be claimable through the presale website once the event concludes. This ensures transparency and eliminates hidden allocations.
- The phased pricing strategy not only creates urgency but also rewards those who join early with significant upside potential.

Utility of CRPX

Unlike many projects that launch without real-world use, Cryptix is built with utility from day one. CRPX tokens will power an expanding ecosystem that includes:

- Payments: Low-cost, near-instant transfers across the BNB Chain. Perfect for microtransactions, remittances, and daily crypto payments.
- Staking: Users can lock their CRPX to earn rewards, supporting long-term holders while reducing circulating supply.
- Gaming: Cryptix will integrate with play-to-earn (P2E) platforms, allowing players to use CRPX for in-game economies.
- NFTs: CRPX will be the primary currency for exclusive NFT collections, enabling digital ownership with real value.
- Community Governance: Through DAO-style voting, CRPX holders will shape the project's roadmap and decisions.

The end goal is to build an interconnected ecosystem where CRPX isn't just a speculative token—it's the heartbeat of everyday blockchain use cases.

Roadmap

A well-structured roadmap is essential to ensure transparency and build trust. Cryptix has a four-phase roadmap, designed to take the project from presale to global adoption.

Phase 1 — Presale Launch

- Launch of official presale website
- Smart contract deployment on BNB Chain
- Token distribution to presale buyers
- Initial awareness campaigns across social media

Phase 2 — Community Growth

- Influencer collaborations on Twitter, YouTube, and Telegram
- AMA sessions with global communities
- Strategic partnerships with early crypto adopters
- First exchange listing (DEX focus)

Phase 3 — Exchange Listings

- Listings on top centralized exchanges (CEX) and PancakeSwap
- Integration with price tracking platforms like Coin Gecko & Coin Market Cap
- Staking pools go live with attractive APRs
- NFT marketplace partnerships

Phase 4 — Ecosystem Expansion

- Expansion into play-to-earn (P2E) gaming
- Launch of Cryptix-branded utility apps
- DeFi integrations (lending, liquidity pools)
- Global marketing campaigns to boost adoption

Security

Security is non-negotiable. Cryptix ensures:

- Smart Contract Audit: Performed by leading security auditors to eliminate vulnerabilities.
- Liquidity Lock: A major share of liquidity will be locked, ensuring investor protection.
- Transparency: Regular updates, open communication, and proof of reserves where applicable.
- Anti-Rug Protocols: No hidden developer wallets or unfair advantages. By focusing on security and transparency, Cryptix will stand apart from projects that cut corners.

Partnerships

Strong partnerships will accelerate growth, Cryptix will work with:

- DeFi Platforms: To provide staking, farming, and liquidity pool integrations.
- Gaming Studios: To integrate CRPX into metaverse and play-to-earn experiences.
- Exchanges: Both centralized and decentralized exchanges for liquidity and trading access.
- Blockchain Communities: Collaborations with leading influencers and crypto groups worldwide. Partnerships will not only expand CRPX's utility but also build long-term confidence in the ecosystem.

Conclusion

Cryptix (CRPX) is more than a presale token—it is a foundation for a growing ecosystem, with fair tokenomics, transparent presale phases, real-world utilities, and a strong roadmap, CRPX is set to become a powerful player on the BNB Chain.

By focusing on community, utility, and transparency, we are building a project that goes beyond speculation to provide genuine value to users.
